### DETAILED OFFICE ACTION

1. Claims 21-27 are pending in the application.

#### Specification

2. The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant cooperation is requested in correcting any errors of which the applicant may become aware in the specification.

#### Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 21-27 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-28 of U.S. Patent No. 6,617,653 and over claims 1-4 of U.S. Patent No. 6,674,131. Although the conflicting claims are not identical, they are not patentably distinct from each other. Claims 21-27 of the present invention is a similar

Art Unit: 2818

version of the claimed invention in claims 1-28 and 1-4 of the above-identified U.S. Patents with similar intended scope.

With respect to 21-27 in order to provide a suitable intended use in the claimed semiconductor device for communication equipment it would have been obvious to one of ordinary skill in the art at the time the invention was made to use the teachings of claims 1-28 of US PATENT 6,617,653 and claims 1-4 of US patent 6,674,131 and his ordinary skills to select known available materials and technologically feasible size and shapes as recited in these claims.

5. When responding to the office action, Applicants are advised to provide the examiner with the line numbers and the page numbers in the application and/or references cited to assist the examiner to locate the appropriate paragraphs.

6. A shortened statutory period for response to this action is set to expire 3 (three) months and 0 (zero) day from the day of this letter. Failure to respond within the period for response will cause the application to be abandoned (see M.P.E.P. 710.02(b)).

7. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d) in Application 09/989,270 which papers have been placed of record in the file.

### CONCLUSION

8. The prior arts made of record and not relied upon are considered pertinent to applicant disclosure: Kuwata (US patent 5,488,237) discloses a semiconductor device with delta-doped layer in channel region
